Projects

Online Library Book Reservation

A web application using PHP for the front-end and MySQL for the back-end.

Technical Stack: PHP, MySQL.

• Residence Core

Developed A web application with Angular as the front-end and Firebase on the back-end.

Technical Stack: Angular, Firebase.

EXPERIENCE

• DELOITTE CONSULTANCY, BANGALURU

Feb 6,2023 - June 22,2023 (5 months)

Completed a 3-month intensive training program in basic Java, culminating in the development of a functional web application as a mock project. Applied performance testing techniques using JMeter to assess and optimize the performance of banking applications. Contributed to the successful execution of project deliverables by collaborating with cross-functional teams and ensuring high-quality outcomes.
